

Summary Report on Property Search Challenges and Solutions

Overview

This report outlines the challenges encountered during the search for rental properties suitable for establishing a coffee house near your desired locations: **Jantar Mantar**, **Delhi University East Campus**, and **DLF Avenue Saket**. Additionally, it reviews the five commercial properties evaluated for sale in **Kalkaji**.

Challenges

1. Limited Rental Options:

- **Issue:** Difficulty in finding rental properties near Jantar Mantar, Delhi University East Campus, and DLF Avenue Saket. This can be attributed to high demand and low availability of commercial spaces in these prime areas.
- **Impact:** This constraint limits immediate opportunities for securing a location, potentially delaying the launch of the coffee house.

2. Proximity Concerns:

- **Issue:** While the properties in Kalkaji are not far from the desired locations, they may not attract the same clientele, such as students and tourists who frequent the selected areas.
- **Impact:** Reduced foot traffic and visibility may affect business performance if the location is not directly aligned with the target audience.

3. Price Variability:

- **Issue:** The commercial properties for sale vary significantly in price, which can make it difficult to find options within a feasible budget, especially in high-demand areas.
- **Impact:** Higher costs may force a reconsideration of budget allocations or compromise on the features and location of the desired property.

4. Size Limitations:

- **Issue:** Many available properties, especially those priced lower, may be smaller in size (e.g., 54 sqft), potentially inadequate for a full-scale coffee house operation.
- **Impact:** Restricts operational capacity and could affect customer experience and satisfaction.

Solutions

1. Expand Search Radius:

- **Action:** Consider broadening the search to nearby areas that are slightly outside the immediate vicinity of your desired locations but still accessible, such as **Kalkaji** or **Malviya Nagar**.

2. Focus on Purchasing Instead of Renting:

- **Action:** Since rental options are limited, consider purchasing a commercial property. This can provide long-term stability and the potential for equity growth.

3. Evaluate Various Property Types:

- **Action:** Look for different types of commercial spaces, such as kiosks or smaller cafes, that can still fulfill the needs of a coffee house. Creative layouts can optimize smaller spaces.
- 4. **Engage with Real Estate Agents:**
 - **Action:** Work with local real estate agents who have a deep understanding of the market and can provide insights into off-market listings or upcoming rental opportunities.
- 5. **Conduct Thorough Market Research:**
 - **Action:** Analyze customer demographics and preferences in the areas surrounding Jantar Mantar, Delhi University, and DLF Avenue to ensure that the chosen location aligns with potential customer bases.
- 6. **Monitor Market Trends:**
 - **Action:** Stay informed about market conditions in your desired locations to identify new opportunities for rental properties as they become available.

Conclusion

The search for rental properties near your desired locations has posed challenges, particularly in availability and proximity. However, the evaluation of properties in Kalkaji provides potential solutions. By expanding your search criteria and considering alternative strategies, you can find a suitable location for your coffee house that meets your needs and budget.
